

Freedom to Create

FOR TEACHERS & STAFF

A Year of Professional Development

Our mission is to educate, elevate, and empower.

Built for the educators who power your district, this ten-month program turns everyday technology into genuine confidence - one practical, classroom-ready skill at a time. Each month builds on the last, carrying teachers and staff from quick wins to lasting systems.

SEPTEMBER  
FALL

The Joy of Hyperlinking

The year kicks off with a quick win - a clickable hyperlinked PDF on any subject, something immediately usable in the classroom. Teaching teams naturally collaborate, dividing subjects and sharing resources. A great way to start.

OCTOBER  
FALL

Let's Make Stuff!

The creative tools already living on every device - Keynote, PowerPoint, Canva, Google Slides - turn out to have endless possibilities. Starting with a blank canvas, we explore elements, layout, and composition before bringing it all together in a finished project. Working files, final products, exporting with purpose - it all starts here.

NOVEMBER  
FALL

Finding Your Style

Every teacher has a style. This month they find it. A personal design kit comes together - fonts, colors, a visual vibe that feels like them. High-quality free images, polished professional materials, purpose-built design tools. No graphic design background necessary.

DECEMBER  
WINTER

Hit Publish

Everything learned since September gets put to work. The goal is simple: make something real. A recipe book, a children's book using student artwork, a class poetry collection, a memory book - the possibilities are endless and the timing is perfect. Just in time for the holidays.

JANUARY  
WINTER

Cloud Control

iCloud, Google, Dropbox, Microsoft - most of us are using all of them and understanding none of them. This month brings clarity. A personal Cloud Map captures the entire setup - what's syncing, what's stored locally, and what's floating in mystery land. No more "where did that go?" moments.

FEBRUARY  
WINTER

Photos: The Master Plan

Every photo, every device, every format - including printed photos and old physical media. This month builds the habits and systems to gather, organize, edit, share, back up, and protect your photo life. Although this is a long term project, we have a little time to create something fun.

MARCH  
SPRING

Quiet the Noise

Inbox. Texts. Group chats. Notifications on every device. Spam, phishing, subscriptions. This month brings it under control - not with inbox zero promises, but with a personal communication playbook that stays manageable long-term. Build sustainable habits.

APRIL  
SPRING

Meet Your Co-Teacher

This one's been done alone long enough. This month introduces the AI tools that work right alongside you - handling the repetitive, the time-consuming, and the overwhelming - so the focus can stay on what only a teacher can do.

MAY  
SPRING

Work Smarter Not Harder

A favorite month. Tips, tricks, shortcuts, Q&A, best practices, and the random things that fill in the blank puzzle pieces that help make everything click. Expect surprises.

JUNE  
SPRING

The Reset

The school year ends the way it should - with a plan. This month is about setting up the next year for success before it even begins. Reflecting, planning, setting up a tracking system, organizing, and stepping into summer with clarity.

BRING THIS PROGRAM TO YOUR DISTRICT

Give your educators a year that changes how they work.

Watch confidence, capability, and joy follow.
